

COMBI WATER TESTING KITS

PHS Combi water testing kits are easy to use and it helps in checking the health of the system by producing quick results. You neither have to be a trained chemist nor require any experience to get reliable results from these test kits.

PHS Combi water testing kits are simple adaptations of classic chemical analytical methods.

Following parameters can be analysed:

- TDS
- Microbiological contamination
- Hardness
- Alkalinity
- Carbon Dioxide
- Chlorine
- pH
- Silica
- Turbidity

You can have complete confidence in the results you obtain from PHS Combi water testing kits, as they are extremely reliable.
